love_IT

Our mindset has always been:
IT should be used better!

That is why bluvizio exists.

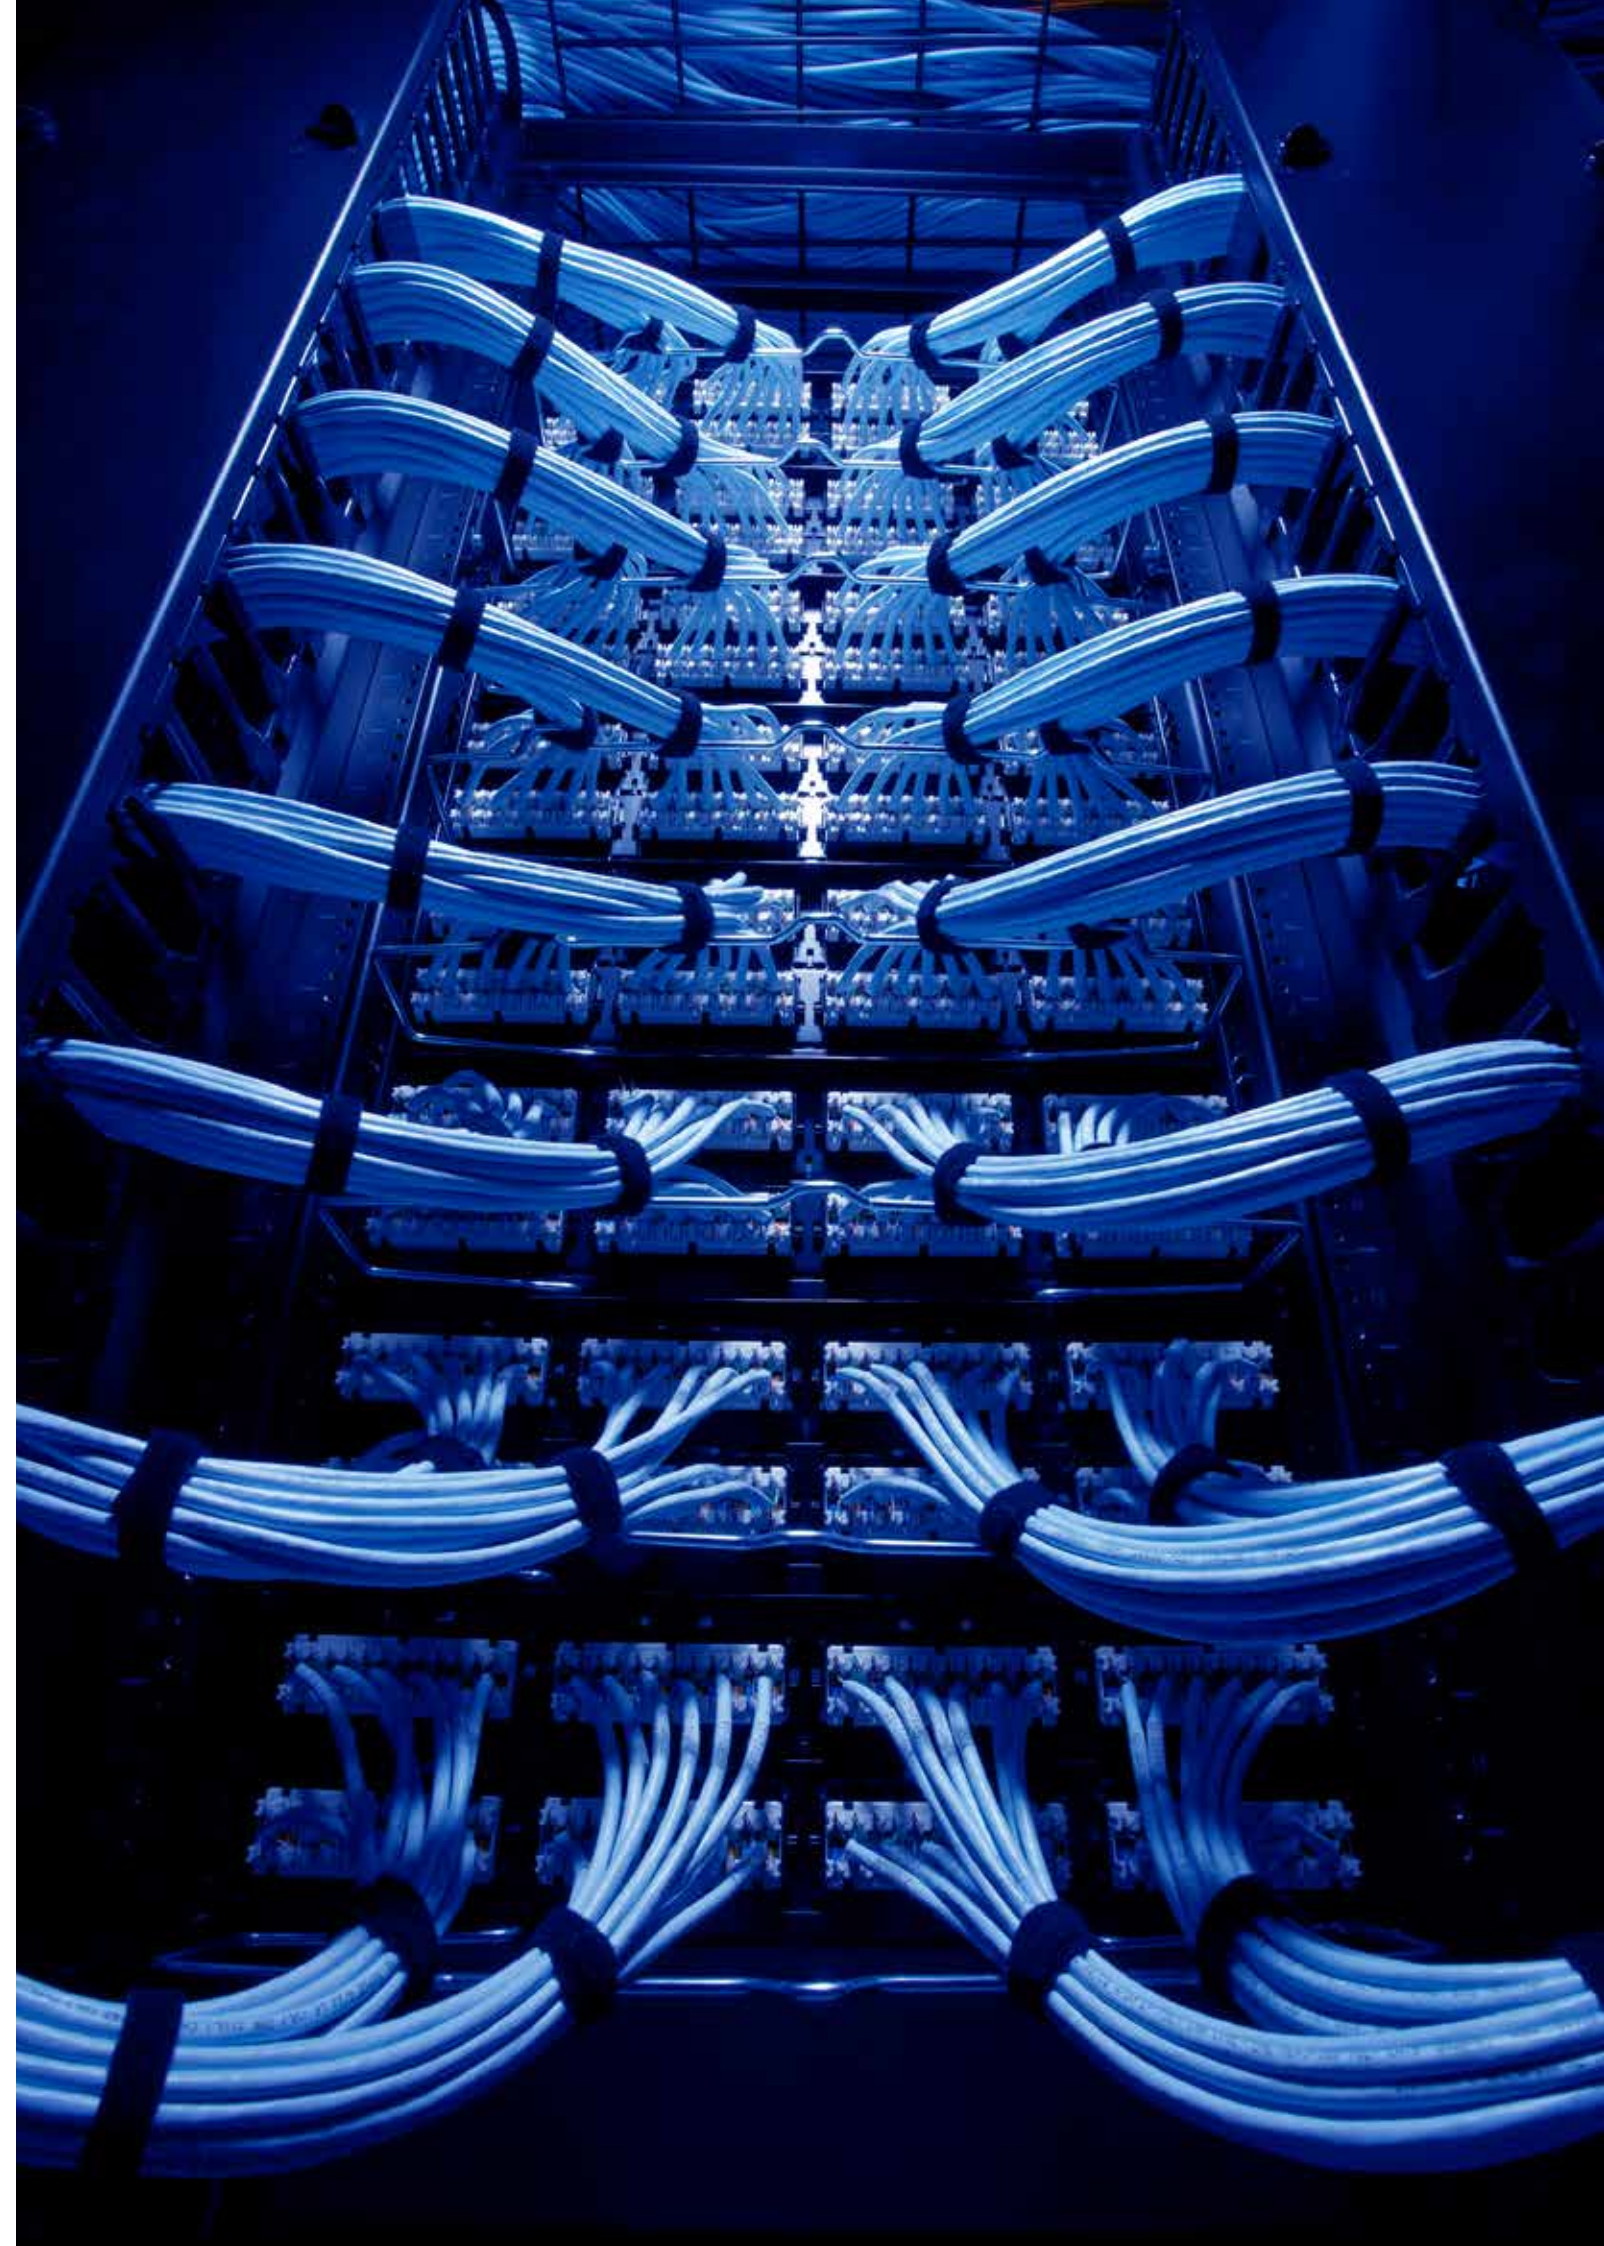

We are convinced that the right IT strategy
significantly improves organizations.

This is what we do for numerous clients today.
And we can do it for you, too.

Since 2009 we have built on the essential
pillars of quality, expertise, custom-fit solutions,
service and fair conditions.

Our comfort zone begins with “all in”.

Because you deserve the best and most
committed IT partner.

Organization

We are bluvio

With us, your IT is in the right hands. As one of Germany's leading solution providers, we have been working for our customers across various industries since 2009. We provide strategic and operational consulting on IT. We also design, deliver, install, and support IT solutions, and offer high-level services in this area.

We are the drivers and companions of our customers' digitalization, constantly helping them to unlock new value-added potential in their IT. Since we have been working cloud-based ourselves since our foundation, cloud computing is part of our corporate DNA. We do what we preach.

With a regular headcount of 20 to 30 colleagues, we are perfectly positioned for an optimal balance of sustainable economic stability and business agility. We are all digital natives and combine experience and commitment with a high degree of automation in our processes.

Our extensive and reliable partner network provides us and our customers with additional expertise and personnel, if so required. This enables us to scale at any time for a project, even at short notice, without losing our own dynamics.

Our client base includes medium-sized and large companies, corporations and public accounts. For our portfolio of products and solutions, we maintain and cultivate relations with numerous technology partners.

„We understand your
technology as well as
your business.“

SEBASTIAN WUKITS,
CHIEF EXECUTIVE OFFICER

CONSULTING

bluvisio_expertise

You want to make the right decisions.
We help you do so.

- “Which technology and which services do we really need?”
- “How do we set the course today to be competitive tomorrow?”
- “How do we profit from innovations while protecting our investments?”

You will find answers to these questions with us. We offer you in-depth knowledge and comprehensive experience for your topics in the areas of future-proof IT, infrastructure, security, digitalization and the Cloud.

Technical decisions often have long-term effects. A good information base provides you with the right foundation for them. We provide independent and competent advice for your strategic and operational challenges.

We pick you up where you currently stand with your considerations. We do not remain vague in our recommendations, but are clear, practical and to the point. We ensure that your IT strategy is aligned to your organizational strategy and generate the maximum value contribution from your IT processes for your business objectives.

SOLUTIONS

bluvisio_systems

We supply the building blocks for your IT.

Your IT architecture contains many parts. Only when they work together in an efficient and coordinated way, individual components become a complete structure with the ability to perfectly support your business.

With us, you will easily find everything you need for the past, present and future of your IT - from individual systems in standard configurations to comprehensive turnkey solutions for practically any requirement and size.

We feature a broad array of products and solutions from a variety of great technology partners (hier den Link auf Technologiepartner englisch setzen) we cooperate with regularly. We also explain to you what you need and why, while always keeping your actual requirements first.

Technology is our passion. You will quickly notice that when you work with us. We pay attention to detail, and our strengths thrive exceptionally when we can work on your individual requirements and configurations.

It makes no difference to us whether you prefer a „one vendor“ strategy or a „best-of-breed“ approach. In combination with our experienced project management, our individual logistics service and our tailored financing options, we are your one-stop shop for all of your requirements.

SERVICES

bluvisio_managed

Let us do that for you.

„Now I don't really have to do that too, right...?“

If this sounds familiar to you, it will now get interesting. Because one thing is for sure: Some tasks are great to delegate. Especially those for which the acquisition and maintenance of internal know-how requires great efforts and which do not concern your own core competencies. In such cases, it is better to find a trustworthy specialist and benefit from his expertise. One like bluvisio. We ensure great execution with predictable costs and high service quality for you. In addition, we also cover vacation and sick leave situations.

With the delegation of tasks to us, we also assume the responsibility for them. At the same time, however, you also retain full control, because we always coordinate closely with you and provide you with exactly the reports and information you need for your decisions.

We have composed comprehensive service packages that you can source from us. With those, we handle the complete business process on your behalf and you receive first-class service - without any effort on your side at all. You simply do what you are great at - we do the rest. This is how real job-sharing works.

From our modular offering you can choose exactly the services that provide you with optimum added value - either individually or in combination. Of course, each of the modules can be adapted to your specific requirements. Think of us as your toolbox - and in it we are your tool and operator in one.

SERVICES

bluvisio_managed

Let us do that for you.

OUR SERVICES FOR YOUR SUCCESS

bluvisio_secure

We provide protection and security for your IT. Our Security Operations Center monitors your network and endpoints constantly around the clock. We detect threats, anomalies and attacks, initiate countermeasures and quickly notify your responsible personnel.

bluvisio_connect

Headquarters - branches - home offices - mobile workforce - cloud - international offices...and the connection between them? That's our job. Including security and the last mile. Worldwide, with solid SLAs and great quality. But without expensive MPLS connections.

bluvisio_restore

We are your business continuity strategy. For this purpose, we guarantee the complete recovery of your IT environment from your data backup within the timeframe you specify. And we also bring and operate the technology behind it. You just resume your work.

bluvisio_cloud

We combine and bundle all resources from the public clouds and the bluvisio private cloud that you require. In addition, we take care of architecture, management and operations - whether you prefer a single or a multi-cloud environment.

bluvisio_hosted IBM i/AIX

We host and operate your IBM i or AIX environment in the secure bluvisio Private Cloud. System maintenance, data backups and operating can also be provided by us. We run systems for production, backup, test, development and high availability.

bluvisio_print

You no longer need to worry about the administration of your printer landscape. We do that for you. We provide all the printers, multifunction devices, consumables and service deployments you need. You only pay a flat fee per page.

bluvisio_workplace

Administration, monitoring, software distribution, updates, security policies - we take care of all this for your endpoint devices. And if you like, we can also provide you with your favorite devices. All for a flat monthly subscription price.

bluvisio_scale

You can obtain Storage systems that grow (or shrink) with your individual requirements from us. You only pay for the storage space you actually use. And the data stays where you want it to be - at your premises or in our data center.

bluvisio_watch

We monitor your IT around the clock. If something unexpected happens, we react reliably and quickly. Depending on our agreement, we start escalation and notification chains or immediately initiate appropriate countermeasures.

bluvisio_run

Via remote access we support and manage your IBM i, Windows and Linux environments. We handle patch management, data backup and various other administrative tasks. We also provide a helpdesk with fast response times.

bluvisio_plan

We take care of everything that has to do with contracts and terms in your IT. We manage service and maintenance contracts, license subscriptions, warranty periods, leasing and rental periods and keep an eye on termination and renewal periods for you.

bluvisio_know

With us you always know what you have in operation - and when you need something new. We provide and maintain an overview of your complete hardware and software inventory. You are always prepared for license audits and compliance checks.

bluvisio_archive

Some data you have to (or want to) keep for a long time. But how do you preserve the media, ensure consistency even after years and maintain the appropriate systems for data access? Quite simple: You give us the data. We take care of the rest.

bluvisio_peace

Current ransomware first encrypts your data backups before it strikes at your productive data. Once you realize it, it's too late. We make sure that there is always a non-encrypted copy that you can access. You sleep much more peaceful.

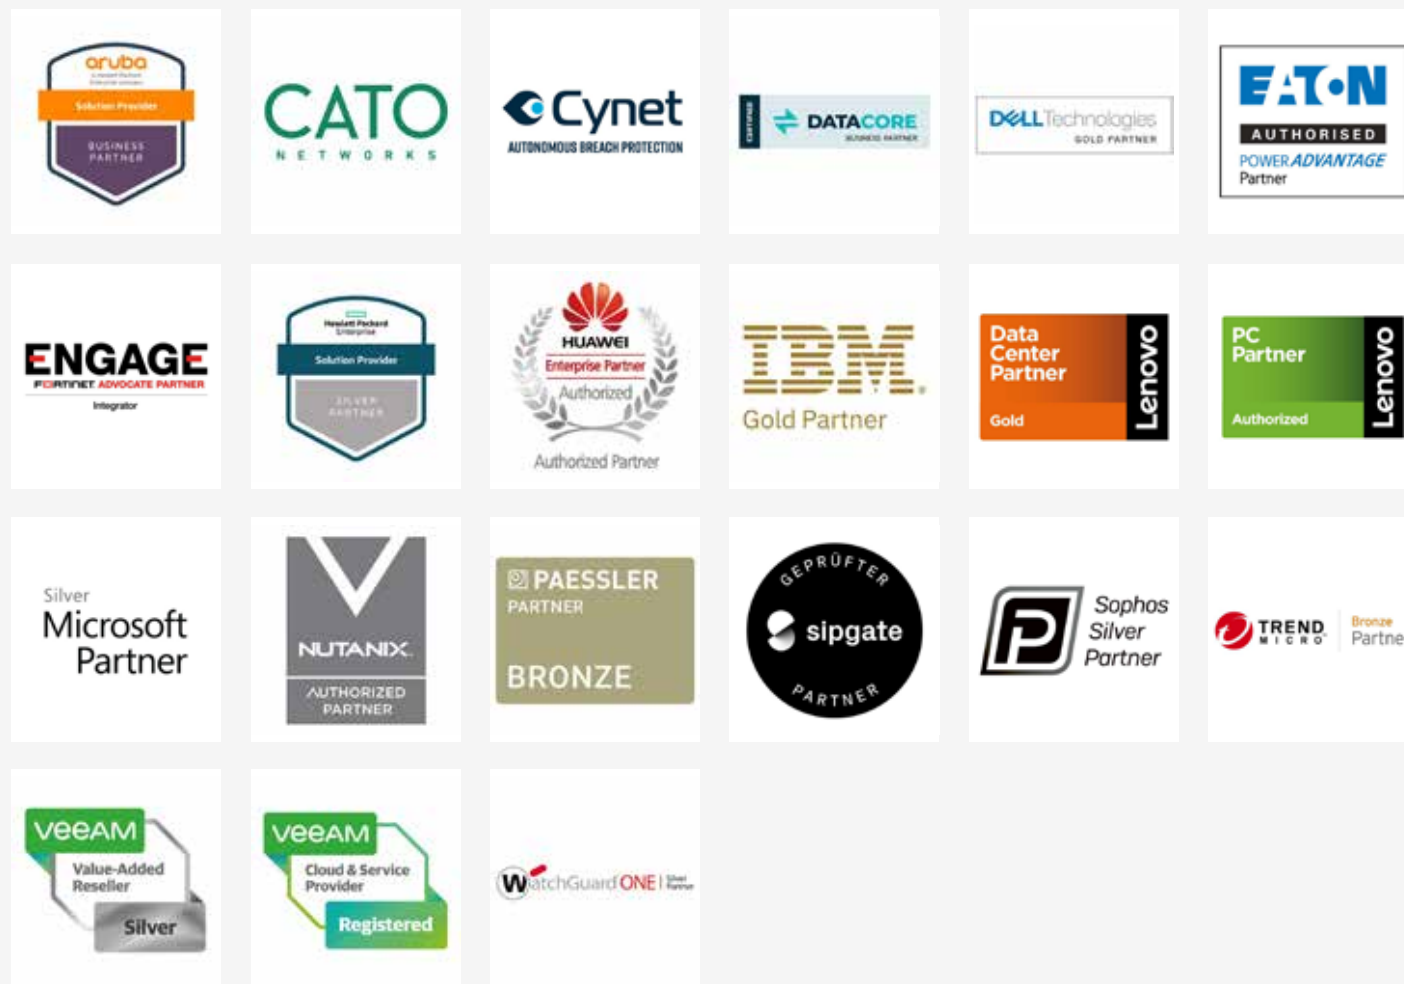

bluvisio_backup

We handle the backup of your complete IT - and if necessary, the recovery as well. We bring all the necessary hardware and software with us. Your data stays where you want it to be: On your premises, in the cloud or in the bluvisio data center.

Technology partners

We are stronger together

For our portfolio of products and solutions, we maintain and cultivate relations with numerous technology partners. This way we always find the best combination for your IT. We can reliably supply everything that you already know you need. If you require help with your selection process, we will gladly compose our recommendation. Get in touch now for an advice.

Locations

Where to find us

We believe that local staff is still important, even in the digital world. After all, it is a people's business. We distinguish ourselves through great availability and short distances - both true benefits for our customers. For us, this is no contradiction to our digital mindset.
